

Report Card Comments (High School) for PowerSchool

The previous comment bank for each high school from MacSchool has been converted and will be loaded into PowerSchool. Each comment now has a category and a new number within that category. The categories are as follows:

- Academic – negative
- Academic – positive
- Attendance
- Behavior - negative
- Behavior – positive
- Fees/debt
- Misc

Comments are numbered consecutively within each category using a prefix abbreviation along with the comment number (Example: ATT01, ATT02, etc). PowerSchool will sort the comment list by category so all comments of a certain type will display together making it easier for teachers to locate appropriate comments for each situation.

At the school level, the PowerSchool administrator may add/edit/delete comments as needed. In addition, you may change the comment category or add new categories.
