

To Enable Pop-ups in IE 7:

Open Internet Explorer. Click “Tools”, then hover over “Pop-up Blocker” until you see the option for “Turn off Pop-up Blocker”. Click this option.

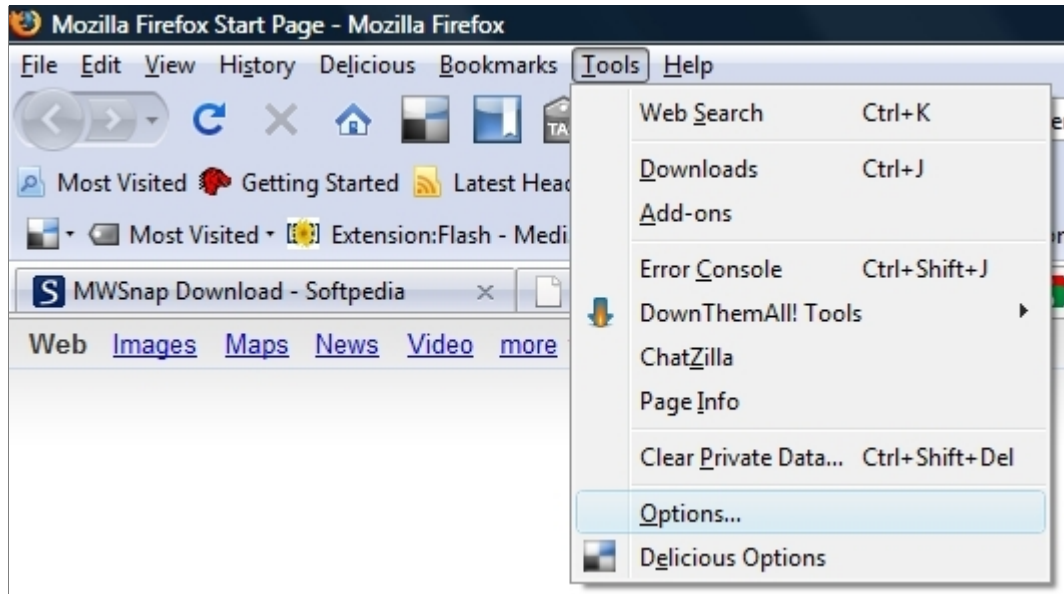

After you click this option you will see another box pop up like the one below. Click “yes” to enable pop-ups.

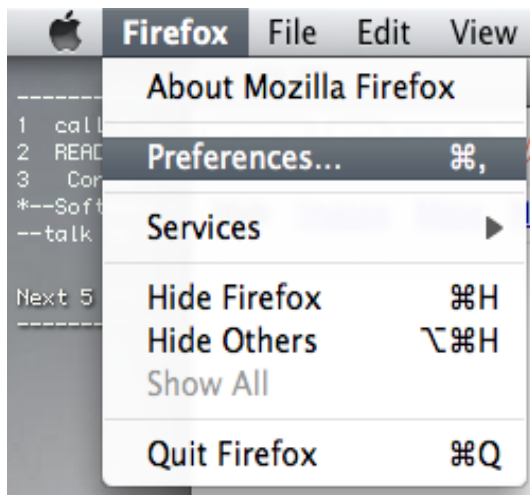

To Enable Pop-ups in Firefox:

This process is similar on both Mac and PC.

On a PC, open Firefox. Click on the “Tools” menu, then click on Options.

On a Mac, click “Firefox” in the top-left corner of the screen, then “Preferences”

On either PC or Mac, after this first step, a box will appear. Click “Content”. You will see an option for “Block pop-up windows”. Make sure that this box is unchecked, then click “Okay”. You have enabled pop-ups on Firefox.
