

## To Check Firefox or Internet Explorer version number on a PC:

This method works for Firefox and Internet Explorer (IE) on a PC.

Open Firefox/IE. Click “Help”, then “About Firefox” or “About Internet Explorer”.

A box will pop up similar to the one below. Below the icon for either IE or Firefox will be the version number. If you are using IE, this number should be higher than 6.

To download the latest version of Internet Explorer, go to:

<http://www.microsoft.com/windows/downloads/ie/getitnow.msp>. Look for the box on the left side of the website that says “Select your operating system”, and select “Windows XP Service Pack 2 or later”.

For Firefox, the version number should be higher than 1.0. To get the latest version of Firefox, go to <http://www.getfirefox.com>, and click the green button that says “Free Download”.
